

ROJO MACHINES FINLAND

ROJO 300

The Rojo 300 mixer is designed to mix the toughest concrete qualities. To ensure fast and even mixing the mixer is equipped with four paddles. Two of the middle paddles are optional, but recommended for tough mixtures.

The bevel gearbox is combined with a 4kW electric motor that is more than enough for traditional concrete mixtures.

Compared to other mixers in our production line, this mixer has no wearing plates on the mixer sides or at the bottom. The mixers paddles, arms and the bridge can be changed as a complete package, in just a few minutes.

Automatic water batching or an vacuum for dust removal can be attached directly to the mixer. The lid is also padded with its own rubber covers that prevent dust from forming.

Capacity:	300 kg of construction concrete.
Electric motor:	4kW 400V / 3-Phase / 50Hz
Gearbox:	Bevel gearbox
Material:	S355 steel
Height:	140 cm
Drainage height:	86 cm
Weight:	410 kg
Drum width:	120 cm
Lid:	Metal mesh lid with dust blocking rubber covers.

MAINTENANCE:

Easy access and cleaning capabilities. The bridge of the mixer can be completely taken off and properly cleaned.

SPARE PARTS:

All wearing parts are easily replaceable and available from the manufacturer. Wearing parts are kept in stock all the time to ensure shortest possible delivery time.

OPTIONAL EXTRAS:

The mixer can be equipped with an automatic water batching and a dust collection system.
